B) Reading Comprehension (16 Marks)

Read the following passage carefully, and then answer the questions below:

Ice-cream is a sweet snack, or dessert made from dairy products. Ice cream has been a favorite snack among people of all age groups. Did you know that ice cream has been around for thousands of years? Of course, in its early history it was nothing like our ice cream today. In fact, ice cream was simply a mixture of snow, nectar, fruit pulp and honey. It can be eaten with or without syrup or biscuits. As time went on, ice cream became more like it is today.

Before the development of the modern refrigerator, ice cream was a luxury reserved for special occasions. With modern technology such as electricity and new inventions such as the freezer, ice cream became much easier to make. In 1904, an ice-cream salesman at the world's fair used a rolled-up waffle to hold ice-cream when he ran out of cups. Thus, the ice-cream cone was invented. Soon, new ice-cream products like sundae and ice-cream soda were invented.
