Unit 7 / Power- the alternatives: الطاقة البديلة

Write your topic here:

Have you ever asked about the benefits of using renewable sources of energy? In Kuwait, petrol is very cheap. Most people use cars because prices are low, and the weather is very hot. Alternative sources of energy are good, because we can save the environment.

First, there are many benefits of using alternative sources of energy. For example, we can save the environment when we use solar power instead of oil. Also, we can save money, because solar power is free. In addition to that, it is clean with no harm to our health. Renewable energy does not cause pollution.

Second, there are many ways to reduce the consumption of oil. For example, we must always switch off the lights when we are out. We can go to school by bus instead of using many cars. Also, we must use the car wisely to reduce waste and pollution.

Finally, we can say that using alternative sources of energy are good. By clean energy, and only by clean energy, we can live in a clean future.

Any farmer would recommend some steps about a good way to move any plant from one place to another. To move a plant safely, you need to water it lightly, so the soil holds together. Then, loosen the soil around the roots and gently lift the plant from its pot or ground. You should place it into a prepared container or hole with fresh soil, making sure the roots are covered and stable. Finally, put the plant in its new pot and water it again to help it settle. These four steps ensure the plant experiences minimal stress and continue to grow well in its new environment.
