INTRODUCTION

English Pearls of Kuwait is a thoughtfully designed English-language coursebook series for intermediate-stage students in Kuwait (Grades 6–9). Developed through rigorous educational research and classroom practice, the series equips learners with effective communication skills in English while honouring Kuwait's cultural identity and values. At the same time, it introduces diverse global perspectives, enabling students to build intercultural competence and broaden their worldview.

Grounded in Kuwait's national curriculum standards and informed by the Common European Framework of Reference for Languages (CEFR), each unit promotes competence across listening, speaking, reading, and writing. The course progressively builds micro-skills, from recognising stress and intonation to mastering vocabulary, grammar and cohesive devices, ensuring a solid foundation for academic and real-life language use. Its differentiated, learner-centred approach addresses varied learning styles and guides every student towards personalised goals.

Aligned with Kuwait Vision 2035, the series nurtures critical thinking, creativity, empathy, and civic responsibility. It aims to develop confident, respectful, and globally aware learners capable of contributing meaningfully to society. It places explicit emphasis on 21st-century skills: collaboration, creativity, critical thinking, problem solving, and effective communication in digital and real-world contexts. These skills encourage reflection on core values: sustainability, equality and responsible citizenship.

Drawing on international best practice, the course integrates Cambridge English vocabulary guidelines and CEFR-appropriate content to strengthen both receptive and productive language skills.

As students journey through these pages, they will explore engaging themes, collaborate on tasks and gain the confidence to express themselves clearly and thoughtfully. We invite learners, educators and parents to discover these pearls of knowledge, where language learning becomes a path to personal and national growth.

The following are the general educational standards that the students are expected to partially achieve by the end of the Intermediate Education:

LISTENING AND VIEWING

Apply listening skills to comprehend oral and audio texts for various purposes, utilising a range of strategies and resources in diverse contexts.

SPEAKING AND REPRESENTING

READING AND VIEWING

Read and view a variety of fiction and non-fiction texts for different purposes using appropriate reading strategies, comprehension skills, and resources across a range of familiar contexts.

WRITING AND REPRESENTING

Produce clear and accurate writing in a variety of text types, using appropriate skills and strategies that reflect the purpose, audience, context, and cultural expectations.

Read the passage; then do the tasks that follow.

A Kuwait is a proud country with strong values and a rich culture. Families and schools encourage children to be **curious**, explore new ideas, and develop their **talents**. Because of this supporting environment, many Kuwaitis grow up confident and ready to succeed in their lives. The following are some outstanding Kuwaiti **explorers** and adventurers who have brought pride to their country.

B Fuad Qabazard is a Kuwaiti mountaineer who successfully climbed Mount Everest in December 2015. He **proudly** raised the Kuwaiti flag there, along with pictures of His Highness the Amir and the Crown Prince. His goal was to **highlight** Kuwait's recognition by the United Nations as a "Global Humanitarian Centre." After returning home, Qabazard explained that his two-week journey was not only a physical challenge but also a way to **represent** his country on an international stage. His achievement brought attention to Kuwait's humanitarian role and **inspired** many people in Kuwait.

C Lamees Najim made history in 2018 when she became the first Kuwaiti to reach the North Pole. She is known for her **remarkable** ability to **fulfil** difficult tasks and is always excited by new adventures. Because of her adventurous spirit, she joined a Euro-Arabian **expedition** led by Felicity Aston, who was the first person to ski solo across Antarctica. The journey included 12 female explorers from different countries, aiming to share their experiences and cultures. This expedition highlighted the strong **will** of Kuwaiti and Arab women to face challenges and **survive** dangerous conditions.

D These inspiring stories highlight the strength and pride of the Kuwaiti people. With the support and effort of its people, Kuwait will continue to shine.

Success: More Than Just Talent

Before You Read

Discuss the following questions.

- a. What does “success” mean to you?
- b. Is success the same for everyone?
- c. Can anyone become successful? How?

Read the blog, then do the tasks that follow.

Blog

www.successinsights.blog

Many people want to know how to achieve success in life. The following ideas can help guide you on this journey.

First, success is not **merely** about talent; it also depends on habits and **mindset**. Achieving success means reaching your goals, whether it is doing well in school, learning new skills, or completing a big project. Successful people **consistently** follow smart habits: they set goals, work hard, manage their time **efficiently**, and never **give up** when things get **tough**.

In addition, having a **positive** mindset is a key factor in reaching goals; this means **trusting** that you can make **progress** and learn from mistakes. Many people fail before they reach their goals. But instead of losing hope, they try again confidently. Research shows that achievers often have personal **traits** such as discipline and a ‘growth mindset’, which means they see failure as a chance to learn and grow.

Furthermore, learning from others can also help you move forward. Watching how achievers plan their time, stay focused, and **remain** calm under pressure can teach us a lot. Reading their stories or listening to their advice helps us understand what works well.

Finally, to make your aims a reality, start by setting clear goals. Break them into small steps. Work daily, even if progress is slow. Remember that asking for help, learning from mistakes, and staying positive are all **equally** important parts of the journey. Success is not magic. It is the result of effort, learning, and believing in yourself.

Learning Unit 1

Lesson Five: Reading

2 Choose the correct answer from a, b, c, or d.

1. What is the main idea of the 4th paragraph?

- a. Most successful people are naturally talented from birth.
- b. Successful people achieve their goals without difficulties.
- c. Most successful people achieve their goals on the first try.
- d. Learning from others' experiences can help you succeed.

2. What is a 'growth mindset' as described in the passage?

- a. Thinking you can grow by learning from your mistakes.
- b. Thinking success is mostly a matter of luck.
- c. Viewing failure as something to be feared and avoided.
- d. Believing that natural talent is all you need to succeed.

3. What feeling does the writer want to create in the reader?

- a. happiness b. inspiration c. surprise d. boredom

3 Which linking words or phrases does the writer use to connect the paragraphs? (e.g., first...)

4 Discuss the following questions.

- a. Name two habits that successful people follow.
- b. Why is failure important for success?
- c. What is the purpose of the writer in writing this passage?

5 Make a personal scrapbook that includes:

- One **goal** you want to achieve
- Three **habits** that will help you reach it
- A short **motivational motto**
- A small **drawing** about success

“The only way to achieve the impossible is to believe it is possible.”

Learning Unit 1

Lesson Seven: Writing

I can:

- **compose** a two-paragraph expository report about expeditions, focusing on safety preparations and challenges.
- **organise** ideas effectively to construct coherent paragraphs about an expedition.

Expeditions: Safety Preparations and Challenges

Before You Write

- 1  Read the passage below, then answer the questions.

Exploring new places can be exciting, but it is not always easy. Adventurers often face dangers when travelling through deserts, mountains, or extremely cold regions. Sometimes, the environment makes the journey challenging, and explorers must think carefully about how they will handle the problems that arise.

Before starting an expedition, people must make good plans. They need to decide what to take with them and how to prepare for unexpected challenges. Careful planning can make the difference between a successful journey and a dangerous one.

- What kinds of places might be difficult or dangerous for explorers?
- Why do explorers need to plan carefully before they travel?
- What problems do you think could happen in deserts, mountains, or polar regions?
- What preparations would you suggest to help explorers stay safe?

- 2  Complete the following table by listing safety preparations explorers should make and the challenges they might face during an expedition.

Paragraph	Focus	Questions to Think about	Your Notes
1	Safety Preparations	• What should people prepare about before going on an expedition? • What important things should people take with them? • How could good preparation make the journey safer?	
2	Challenge	• What problems might explorers face in difficult environments? • How could these problems affect the expedition? • What might happen if someone is not ready for these challenges?	

Learning Unit 1

Lesson Seven: Writing

Before You Read

Read the message on the phone screen, then discuss the questions with a partner.

- Would you trust this message? Why or why not?
- What makes you think this message is fake?
- Why do people sometimes believe such messages?

Read the passage and do the tasks that follow.

Last Friday, Ahmed was **casually** scrolling through his phone when he received an unexpected message. It **claimed** he had won a brand-new smartphone and asked him to click on a link to get his prize. The message looked real and even used the logo of a well-known company. Ahmed looked at the message and thought to himself, "If people receive a similar message, they will feel curious enough to open it, just like I did." The link took him to a website that appeared real. It requested his name, email, and password. Ahmed quickly entered his details and continued with his day, feeling certain everything was fine.

That evening, when he attempted to log in to his social media account, his password was **rejected**. He tried several times, but the screen continued to show "Incorrect password." At that moment, Ahmed realised that the link he had trusted earlier was **fake**. He began to feel **uneasy**. Later, when he understood what had happened, Ahmed thought, "If someone got **access** to your personal accounts, they would misuse your information."

Ahmed started acting immediately. He **updated** all his passwords, **installed** antivirus software, and reported the problem to the company's IT department. They told him that the link was part of a **phishing scam** designed to trick students across the school.

Since then, Ahmed has taken his online safety more **seriously**. He no longer clicks on strange links, regularly checks website **security**, and stays **cautious** when sharing personal information. As a result of this experience, he thought, "If people think before they act online, they will reduce the risk of being attacked."

Humans vs. Machines: The World of AI Chatbots

1

Before You Read

Discuss the following questions.

- a. Do you use AI chatbots?
- b. Can machines understand feelings like humans?
- c. What tasks do you think only a human can do?

Read the passage, then do the tasks that follow.

Today, many people communicate with machines. We use AI chatbots to answer questions, play music, and give directions. When shopping online, people often interact with chatbots for assistance. Some users even **genuinely** communicate with AI chatbots as if they were real people. However, can machines truly **replace** human conversations?

AI chatbots are **software** programmes designed to understand what people say and reply in a simple and clear manner. They can **assist** with writing tasks, support language learning, and provide quick answers to questions. Many companies rely on chatbots. They believe chatbots are **efficient** and available 24/7.

In schools, AI can help students learn new words or practise writing. At work, chatbots can respond to **customer** questions or help with simple jobs. In daily life, you can use a chatbot to make a shopping list, check the weather, or **implement** simple plans for your day.

However, there are certain problems. AI is not always **accurate** and can sometimes give incorrect information. It cannot fully understand feelings or **complex** situations. For example, if someone shares a personal problem, the chatbot might not know how to help or **evaluate** the situation properly.

In addition, if you **increasingly** use AI, you may stop asking for help from real people. It is important to talk to teachers, doctors, and friends when you need real help because they can understand your feelings, use good **judgement**, and give personal advice. A chatbot is only a tool.

Learning Unit 2

- a. answers
- b. many companies
- c. questions
- d. software programmes

3. The underlined word "respond to" in the 3rd paragraph means:

How to Stay Safe Online

1

Read the model expository paragraph below and answer the questions that follow.

How to Stay Healthy During Exams

Paragraph 1

Exams can be a very stressful time for many students. Because of this, some students stay up too late and do not get enough sleep. In addition, others eat too much junk food and do not take breaks while studying. These habits can make students feel tired and lose focus. When students do not take care of their health, it becomes harder to study well and remember important information.

Paragraph 2

There are many easy ways to stay healthy during exams. First, students should try to sleep at least seven hours a night. Next, it is better to eat healthy food such as fruits, vegetables, and whole grains. Drinking enough water is also important to stay focused. Finally, taking short breaks and doing light exercise like walking can help the brain work better. These habits will help students feel better and do their best in exams.

- b. Have you ever tasted any of them?

Food is more than just something we eat to stay alive. It tells stories about where we come from. Every country has special dishes that **reflect** its history, traditions, and lifestyle. Whether it is a spicy meal cooked at home, or a famous dish **served** during celebrations, food connects people and cultures. Let us explore traditional dishes from three different countries and discover what makes each one unique. Get ready to travel the world through food!

Machboos: A Kuwaiti Classic

Machboos is more than just a national dish in Kuwait; it is a **symbol** of the country's rich history, culture, and family traditions. For generations, Machboos has been at the heart of Kuwaiti life, bringing people together on both ordinary days and special **occasions**. In the past, traders brought new spices to Kuwait, and families carefully chose **aromatic ingredients** to give Machboos its **distinctive** and spicy taste. **Recipes** were often passed down from parents and grandparents, with each family adding its own touch. Machboos is made with rice, meat, and spices. It is usually served on big plates and is **commonly** eaten with sauces like *daqous*, which enhance its **flavour**. Serving Machboos shows kindness and respect to guests and reflects how Kuwaitis proudly **embrace** their traditional cuisine.

Pasta: A Part of Italian Life

Pasta is a traditional food in Italian cuisine, known and loved around the world. Over time, the way Italians flavoured pasta has changed. At first, they used sugar, but later they used vegetables, which made pasta healthier. Tomatoes were only added in the 1800s, and the first recipe for spaghetti with tomato sauce appeared in 1844. Today, each part of Italy has its own style of pasta and sauce, and these recipes are often passed down in families. Pasta is now widely enjoyed by people of all backgrounds at home, in restaurants, and during family events. For Italians, pasta is more than food; it is a symbol of tradition, togetherness, and the joy of enjoying life at meals.

The Story of Sushi: A Japanese Tradition

Sushi is one of the most well-known foods from Japan. People all around the world enjoy it. In Japan, Sushi is often enjoyed during celebrations and family gatherings. However, Sushi is more than just a tasty meal; it is a symbol of Japanese culture and tradition. Sushi began over a thousand years ago as a way to preserve fish, but today it is made with a **variety** of ingredients, including cooked or **raw** fish, vegetables, and even fruit. There are many types of Sushi, such as *Maki*, *Sashimi*, and *Temaki*. Sushi chefs, known as *itamae*, train for many years to master their skills. Sushi is often served with wasabi, pickled ginger, and soy sauce to add extra flavour. Eating Sushi is more than a meal; it is experiencing Japanese culture in every bite.

Discuss the following questions.

1. What do you usually eat in a day?
2. Do you think your diet is healthy? Why or why not?
3. Have you noticed any new popular foods or eating habits recently?

Did You Know? Food Trends

Foods like yogurt and cottage cheese are popular for being healthy.

Crunchy Snacks:

Seaweed chips and popcorn are fun and trendy!

Foamy Drinks:

Drinks like cloud coffee with cream or coconut water are new favourites.

Healthy Choices: Eating Well Today

People everywhere are becoming more interested in healthy eating. Good food is important for our bodies and minds. When people make better food choices, they often feel more **energetic** and are less likely to get sick. Some foods are healthier than others. For example, vegetables and fruits are important **sources** of vitamins, minerals, and **fibre**. Diets that are rich in these foods can **considerably** lower the risk of obesity and heart disease. These days, people are learning more about what is in their food. More families cook at home because **homemade** meals are often healthier, cheaper, and you can control what ingredients you use. Supermarkets now offer a greater variety of fresh **produce** than ever before. Additionally, **organic** foods are becoming more popular because they are grown without **harmful** chemicals.

Comparatives show the difference between two people, things, or groups. Example: Vegetables are healthier than snacks.	Superlatives show that something has the highest or lowest degree of a quality in a group of three or more . Example: This is the most delicious dish on the menu.
• Use -er / -est with most one-syllable adjectives (small, smaller, the smallest). • Use -er / -est with two-syllable adjectives ending in -y (happy, happier, the happiest). Change y to i before adding -er or -est. • Use more/most or less/least with: • most adjectives of two syllables (not ending in -y) (more modern / the most modern). • all adjectives of three or more syllables (expensive, more expensive, the most expensive).	
Some adjectives do not follow regular rules:	
good	—→ better —→ the best
bad	—→ worse —→ the worst
little	—→ less —→ the least
much / many	—→ more —→ the most
far	—→ farther / further —→ the farthest / the furthest

What Does It Mean to Live Simply?

Before You Read

1

Look at the title. Choose what you think this passage will be about. Tick (✓) your ideas.

☐ Buying more things

☐ Saving water and electricity

☐ Reducing screen time

☐ Spending more time with family

☐ Eating out at restaurants

☐ Helping the environment

Living simply means choosing a lifestyle that **focuses** on what is truly important. It does not **necessarily** mean giving up everything or living without comfort. **Instead**, it means using fewer things, spending less money, and being more **thoughtful** about how we live. People who choose simple living often ask themselves, “Do I really need this?” before they buy something.

Many people begin this lifestyle to reduce stress or save money, while others are motivated by a desire to protect the environment. To achieve these goals, individuals often try to produce less waste, use less plastic, and recycle more. Additionally, they may choose to buy fewer clothes, which not only helps them save money but also **benefits** the environment. Furthermore, adopting this lifestyle can include eating local food and making an effort to **conserve** water and electricity.

However, living simply is not only about having fewer things; it is also about making smarter and more meaningful choices in everyday life. Rather than spending money on the newest **gadgets** or fashionable clothes, many people choose to invest in important things such as healthy food, education, and **valuable** experiences. For example, some people reduce their screen time to enjoy family moments or practise their favourite hobbies. Others choose to walk or ride a bike instead of driving short distances. Additionally, many people learn to cook meals at home rather than eating out, which saves money and improves health. Some also plan their shopping carefully to avoid wasting food or money.

Making smart choices is not always easy, but it helps people feel more in control of their lives. **Frankly**, each small step brings us closer to a simpler and more **balanced** life.

Learning Unit 4

Lesson Five: Reading

Expository

Waste Less, Save the Planet

Before You Read

- 1  Look at the table below. Decide which items you think are wasteful and which are wise choices.

Work in groups and tick a ✗ for wasteful and ✓ for wise. Then, discuss the questions that follow.

Item or Action	Wasteful (✗)	Wise (✓)
Buying a new phone every year		
Bringing a reusable water bottle		
Throwing away old clothes		
Using plastic bags for shopping		

1. Which actions do you do most often?
2. Why do people sometimes waste things?

Read the passage, then do the tasks that follow.

Waste Less, Live More

Every day, we throw away more things than we think. For example, we **discard** plastic water bottles, old clothes, food **packaging**, and paper. Much of what we call ‘trash’ could be reused, recycled, or even avoided completely.

Reducing waste is not just about the environment. It is about living wisely and **responsibly**. When we use only what we need, we can **minimise expenses** and **preserve** natural resources. For example, bringing a reusable water bottle, saying no to plastic bags, or using a lunchbox instead of **disposable** wrappers can make a big difference.

Some people follow the three R’s rule: Reduce, Reuse, Recycle. First, they try to reduce **consumption** by choosing only what is necessary. Then, they reuse items like containers or bags. Finally, they recycle materials such as paper, glass, and plastic so that these materials can be made into new products.

Even small actions matter. Turning off lights, **donating** old clothes, and using digital notes instead of paper are all smart ways to reduce waste. These simple actions lead to a healthier planet and a more **mindful** lifestyle.

As the Holy Qur’an reminds us:

“Indeed, the **wasteful** are brothers of the devils.” (Surah Al-Isra, 17:27) Being careful with our resources is a serious social responsibility.

Learning Unit 4

Lesson Five: Reading

2

Choose the best answer.

1. What is the main idea of the passage?

- a. We should stop shopping completely.
- b. Reducing waste helps the planet and our lives.
- c. Recycling is too difficult for most people.
- d. Using digital notes can be bad for the environment.

2. Which word in the 2nd paragraph has a similar meaning to "save"?

- a. need
- b. preserve
- c. bring
- d. use

3. According to the passage, which action is NOT a way to reduce waste?

- a. Recycling plastic water bottles.
- b. Throwing away paper and food packaging.
- c. Turning off lights when not needed.
- d. Using a lunchbox instead of disposable wrappers.

3

Discuss these questions, then share your ideas.

- 1. What ideas from the reading do you agree with? Why?
- 2. Why is it sometimes difficult for people to reduce waste?
- 3. What does the Quranic verse mentioned in the passage teach us?
- 4. What is the writer's purpose in writing this passage?

4

Think of a wasteful habit (e.g. wasting food, wasting electricity, buying things you don't need... etc.)

Write 2-3 sentences about how you will change it and why.

Sentence Starters:

I will try to stop...

I plan to use...

- Next to each noun, **write “C” for countable** or **“U” for uncountable**.

Countable nouns can be counted (e.g. an apple, two apples, three apples, etc.)

Uncountable nouns cannot be counted.
(e.g. *air, rice, water, etc.*)

Nora: I try not to spend much money on things I don't need.

Sara: That's smart. I usually bring some snacks from home.

Nora: Do you check for any offers before shopping?

Sara: Always! I also save a little time by planning ahead.

Nora: I follow many accounts that give smart saving tips.

Sara: Me too. But sadly, few students really think before spending money.

Nora: Yes, and some of them don't make any plans before they shop.

- Which quantifiers are used with countable nouns (e.g. *snacks*)?
- Which quantifiers are used with uncountable nouns (e.g. *money*)?
- Which quantifiers are used in questions and negative sentences?
- Which quantifiers show a small number or amount?

- Use quantifiers (such as *some, any, much, many, few, etc.*).
- Take turns being different family members talking about what to get for the event.
- Make at least four exchanges in your conversation.
